

# TERMS OF USE

Selling items with this design is only allowed for small home based crafting businesses!

Please contact us at [hello@bigrelldesign.com](mailto:hello@bigrelldesign.com) for other uses.

## POSSIBILITIES – Do this!

- Create physical items for personal use.
- Use your cutting machine and decorate a physical item, like a T-shirt, water bottle or notebook that you sell in your small home based crafting business. Make hundreds of items this way, but not thousands.
- Please leave a link to our shop if you sell online! [bigrelldesign.etsy.com](http://bigrelldesign.etsy.com)

## RESTRICTIONS

- No mass producing.
- You cannot sell stickers, prints, decals or transfers made from these files. But you can decorate an item with them, and sell that item.
- No reselling, redistribution, sharing or transferring of files allowed.
- You may not use these files in any part to make your own files to sell.
- You can NOT have a printshop/manufacturer make things for you with our design.

*Why? Because we support and love other small home based crafting businesses, and have set our prices to reflect that. A large business with big printing machines are not allowed to make profit from our hard work for that low price. Please contact us at: [hello@bigrelldesign.com](mailto:hello@bigrelldesign.com) if you have questions or want to buy a license for larger scale productions.*

## **We support your creativity!**

You make things that people love to buy and use, because you put your love, creativity and effort into your work. Your time spent weeding and carefully decorating the item that you sell. We love that, and your customers will too!

That is why we allow you to create hundreds of items with this design, but not thousands.

Why? Because we put lots of time, love and energy into drawing, designing, creating and adapting our work into files that work smoothly with your cutting machine.

We are two sisters with a small business too. We hope you will love working with these files as much as we loved creating them.

*Happy creating!*

*Thank you  
for respecting!*
